

Quality & Safety to Industry Standards

Increasing levels of regulations concerning production of food demand higher standards of water quality. Donaldson provides high quality filtration products which meet these regulations.

Specifically in sterile process or ingredient, water applications - Donaldson filters will help you to avoid product exposure to microorganisms (bacteria and mould) and help to avoid contamination of food.

- High operation safety and compliance with EC/FDA regulations
- Superior product performance: Extended service life, high operational safety, reduction of production downtime
- Complete product range of sterile air-, steam-, venting and liquid filtration from one single source

High quality filter housings and filter elements are manufactured in accordance to FDA, CFR Code of Federal Regulations Title 21 and (EC) 1935/2004/EC and EC 10/2011
